

Limits of use

- Liquid temperature: 0°C ~ +60°C.
- Power: single-phase 220V/50Hz, three-phase 380V/50Hz.
- Max. working pressure:
 - 10 bar for MHF/5A/5B
 - 12 bar for MHF5BM/5AM/5AH

Features

- The special design on the impeller allows liquids containing relatively high levels of impurities to be pumped without the risk of the impeller clogging.
- The special design on the pump casing and impeller to assure relatively high flow.
- Wide range voltage 180-240V is allowed for this pump, very suitable for the use in irrigation.
- The pumps for boosting hot water are also available on request.

Application

- Be used to delivery the water in sewage treatment system.
- Be used to delivery the water in agriculture, garden, mining etc.
- Be used to pump the water from the canals, rivers, reservoirs for the industrial use.

Components & Materials

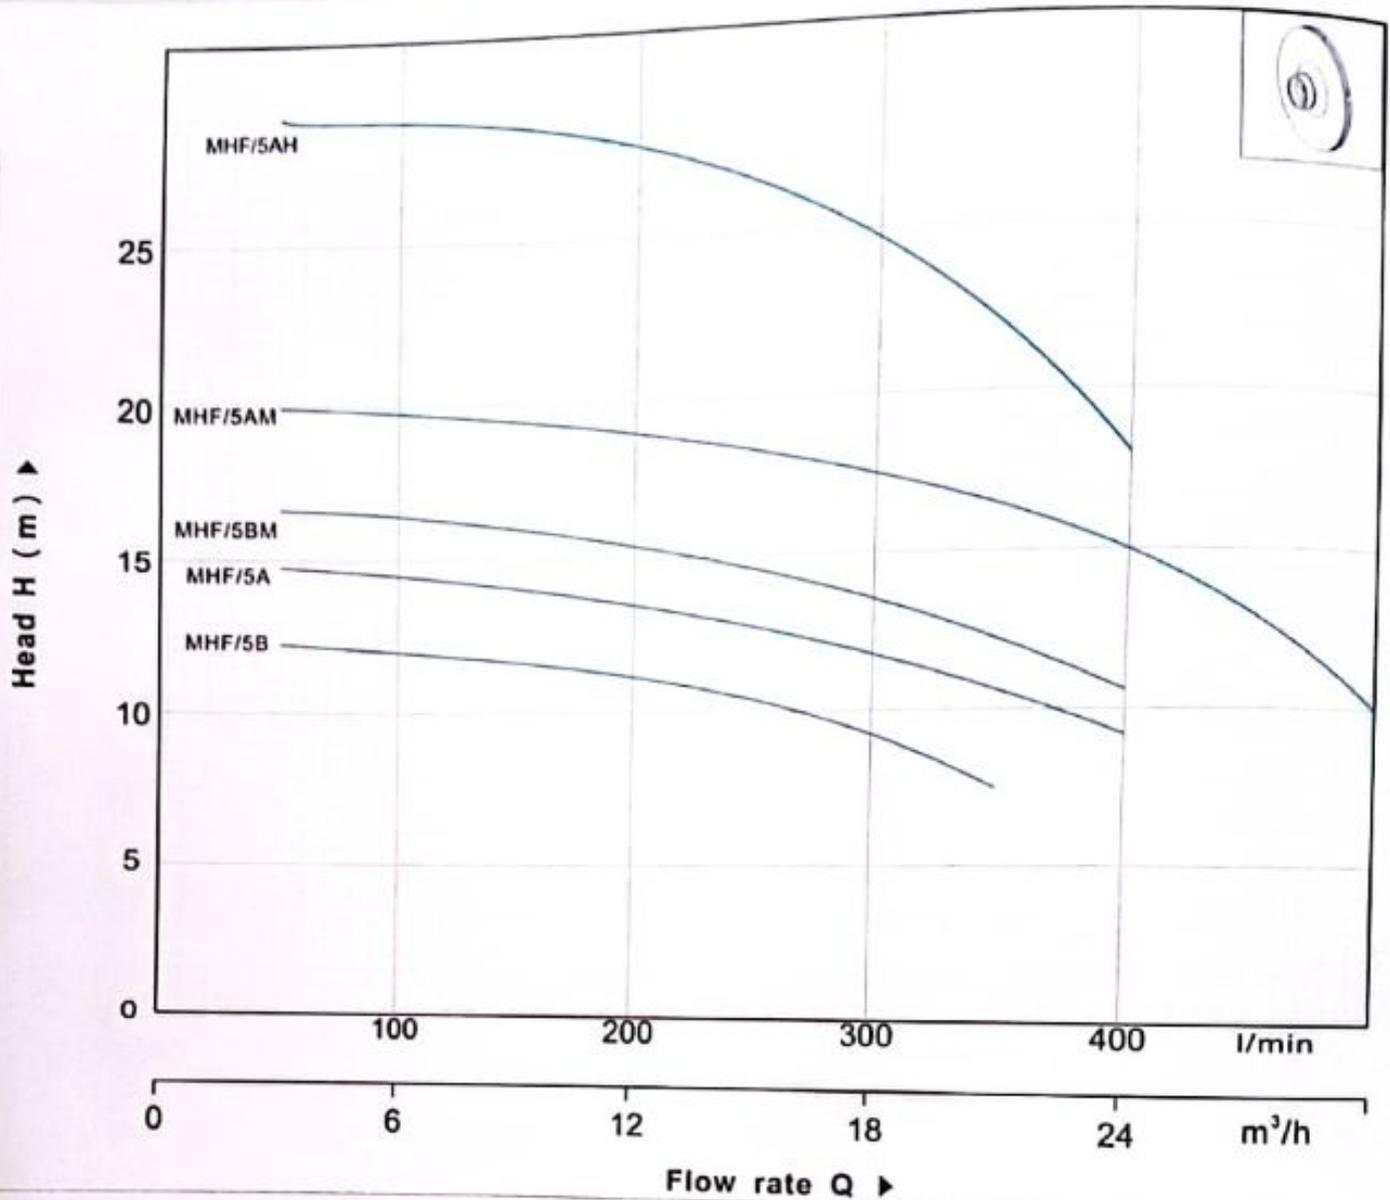

- Pump body: Cast iron with electrophoretic paint.
- Impeller: Brass.
- Mechanical seal: Graphite-Ceramic-NBR.
Graphite-Sic-FPM for hot water.
- Bearing: Z4 class.
- Shaft: Stainless steel.

Guarantee

- 2 years subject to terms and conditions.

50 Hz n=2850 rpm Hs=0 m

CHARACTERISTIC CURVES AND PERFORMANCE DATA

Model		Power		Q	H m
