

V2200F

Technical Data:

Model	Power (KW)	Outlet diameter (mm)	Voltage (V/Hz)	Max.flow (l/min)	Max.Head (m)	Max diameter of	G.W.	Dimensions
V2200F	2.2	76	220/50	700	17	20	34	58.5x36.0x24.5

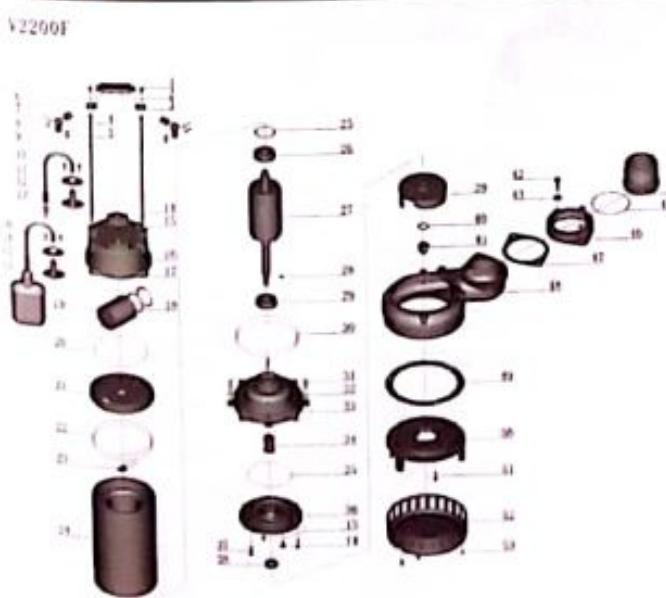

Condition of Usage:

- The maximum depth allowed in water is 5m from its center of impeller;
- The temperature of trans medium's shouldn't be higher than 40°C;
- The trans medium's PH scope is 4~10;
- The kinematics viscosity of the trans medium is $7 \times 10^{-3} \sim 23 \times 10^{-3}$ m²/s;
- The maximum density of the trans medium is 1.2×10^3 kg/m³.

Function and Feature:

This advanced VI(WQ)series,a branch of single-phase and three phase drainage pumps, will be your ideal drainage helper. The letter "V" which substitutes for the letters "WQ" indicates the distinct design of the filter and the broadness of the high efficient area. It can work safely and efficiently at high flux with the feature of complete heads. The design is designed to a wide tunnel which helps to convey the long fiber liquid or the solid whose diameter is about 10mm. The selection of bottom suction structure stainless steel and special cast iron made the pump has the capabilities of complete drain and high resistance of abrasion and corrosion. The float switch can automatically control on and off with the change of the liquor level. The protector in the motor can automatically cut off the power when it overheated or overcurrented thus guarantee the security and reliability of pump's run even in the atrocious environment.
